Map Assignment

Question 1:

create a HashMap as :

- key:String (Indian-state)
- value: String (capital of that state)

Add 5 Indian state and their capital into this map and print all the entries one by one from this map.

Question 2:

Create a Student bean class with following fields:

- roll
- name
- marks

create a Map as

- key: Student (student object with the proper details)
- Value: String (Indian-state name)

Sort this Map according to the student marks using TreeMap and print the state name and the corresponding student details in sorted order.
